8. (amended) [Use of the devices according to Claim 1 to 6 to modify] A method for modifying mechanical natural vibrations in machines, vehicle running gear or motors[, in particular] selected from the group consisting of balancing machines, machine tools, unbalance generators, testing machines, resonance testing machines, alternate-bending machines, screen conveyors, eccentric presses, crank mechanisms, vibration and resonance drives, vibratory gear mechanisms, internal combustion engines, [/] electric motors [or] and engine mounts.

REMARKS

The Preliminary Amendment is being filed to eliminate multiple dependency and conform the claim language to conventional format.

Respectfully submitted,
SPRUNG KRAMER SCHAEFER & BRISCOE
